

Image Style Library

38 styles grouped by visual similarity, with key differentiators

Warm & painterly

Soft brushwork, inviting light, emotional atmosphere

Studio Ghibli

nature · wonder · outdoors

Lush, handcrafted environments. Dappled sunlight, golden afternoon, misty mornings. The world breathes.

vs Ember: Ghibli is nature and daylight; Ember is interiors and candlefire. Ghibli feels vast, Ember feels intimate.

vs Aquarelle: Ghibli has rich saturated environments; Aquarelle is quieter and more restrained.

Ember

taverns · candlelight · intimacy

Amber-lit dark fantasy interiors. Warmth as the dominant emotion. Feels safe despite the darkness behind it.

vs Ghibli: Same warmth, totally different setting. Ember lives inside at night; Ghibli lives outside in daylight.

vs Storybook: Both warm, but Ember is darker and anime-rendered; Storybook is watercolor and child-safe.

Aquarelle

watercolor · restraint · oc portraits

Delicate watercolor anime. Rough linework, faint paper texture, generous negative space. Characters feel unconventional.

vs Gossamer: Aquarelle has analog texture and warmth; Gossamer is clean digital with a cool, nearly shadowless finish.

vs Storybook: Aquarelle is anime and character-forward; Storybook is illustrated children's book.

Storybook

fairy tales · animals · wonder

Gouache/watercolor washes over ink linework. Warm ochres, dusty roses, cream. Safe, wonder-filled, clearly readable compositions.

vs Aquarelle: Storybook is children's illustration energy; Aquarelle is anime with analog texture.

vs Daily Chibi: Storybook has environments and fairy-tale framing; Daily Chibi is modern anime slice-of-life indoors.

Storybook Impasto

thick gouache · textured · handcrafted

Heavier, more tactile Storybook variant. Thick opaque gouache, visible dry-brush strokes, prominent paper texture. Flat matte color blocks, no glossy or digital sheen anywhere.

vs Storybook: Same warm palette and whimsy, but Impasto has thick visible brushwork and paper texture; Storybook is smoother digital watercolor.

vs Aquarelle: Both have analog texture, but Impasto is children's illustration with heavy paint; Aquarelle is anime with delicate washes.

Makoto Shinkai

skies · longing · golden hour

Hyper-detailed atmospheric skies, volumetric light rays, intensely saturated color. Photographic backgrounds, clean anime characters.

vs Ghibli: Both painterly outdoors, but Shinkai is hyper-saturated and near-photographic in the background; Ghibli is hand-painted.

vs Cinematic Anime: Shinkai is all about sky and atmosphere; Cinematic Anime is grounded in real-world equipment.

Moe Gacha

extreme chibi · warm painterly · mascot

Extreme SD proportions (head 65-75% of height), soft airbrushed cel shading, gentle bloom, and a still, presentational mascot pose. Vinyl-figure and gacha key-art quality.

vs Flat Chibi: Same extreme proportions, different render. Moe Gacha is warm and painterly; Flat Chibi is flat cel — bold and graphic.

vs Gacha Splash: Moe Gacha is full-chibi; Gacha Splash is semi-chibi (head only slightly oversized).

Daily Chibi

semi-chibi · slice-of-life · cozy mundane

Mild chibi proportions (head about 1/4 of height) in carefully rendered everyday scenes — cafes, bedrooms, convenience stores. Warmth and mundane charm over drama.

vs Moe Gacha: Daily Chibi is static and domestic; Moe Gacha is dynamic and action-ready.

vs Storybook: Daily Chibi is modern anime cozy; Storybook is illustrated fairy-tale with animal characters.

Epic & cinematic

Scale, jewel tones, and grand world-building drama

Dark Fantasy

epic · jewel tones · world-building

Brooding and saturated. Deep emerald, crimson, obsidian. Near-black backgrounds. Epic scale. Dangerous but visually gorgeous.

vs Soulslike: Dark Fantasy is vivid and saturated; Soulslike is desaturated and desolate. Same genre, opposite color.

vs Ufotable: Both dark and dramatic, but Ufotable is anime action with particles; Dark Fantasy is static concept art.

Ufotable

action · particles · supernatural spectacle

High-production dark fantasy anime rendered vivid and saturated, not bleak: rich jewel tones, cinematic polish, supernatural effects as visual spectacle.

vs Dark Fantasy: Ufotable is anime action with particles and blade-light; Dark Fantasy is static concept art.

vs Shounen Burst: Both action, but Ufotable is polished jewel tones; Shounen Burst has a warm sepia world being shattered.

Miura

crosshatch · armor obsession · monochrome

Dense precise crosshatching. Monochromatic or near-monochromatic. Obsessive structural detail. Feels engraved rather than drawn.

vs Soulslike: Miura is about the character's surface — every rivet; Soulslike is about the environment.

vs Ironbloom: Both armor-heavy, but Miura uses dense crosshatch and heavy blacks; Ironbloom uses clean lineart with white-background isolation.

Vibrant & graphic

Boldness, graphic impact, immediate readability

Neon Noir

rain · cyberpunk · night city

Rain-slicked streets reflecting neon signage. Deep shadows punctuated by electric magenta, cyan, and amber. Mystery and dystopia.

vs Ufotable: Neon Noir is photographic urban night; Ufotable is anime action with particle and blade-light effects.

vs Velvet: Neon Noir's electric undertones inform Velvet's palette, but Velvet is a still, glossy portrait — not a rain-soaked street.

Cel Shading

graphic novel · bold outlines · poster energy

Bold black outlines, fully saturated flat fills, high-contrast shading. No gradients. The visual language of toon-shaded action games and comic books.

vs Flat Cel: Cel Shading is louder — thick outlines, max saturation, poster composition. Flat Cel can be quiet. Cel Shading is never quiet.

Retro Anime

80s-90s · film grain · analog nostalgia

Akira, Ghost in the Shell, Cowboy Bebop. Film grain, color bleed at edges, visible cel artifacts. Nostalgia is the point.

vs Webtoon: Webtoon is ultra-modern crisp; Retro Anime deliberately imitates analog degradation.

vs Shounen Burst: Retro uses actual 80s/90s production aesthetics; Shounen Burst uses warm degradation for emotional contrast.

Shounen Burst

power awakening · warm vs cold · urban destruction

Warm aged-paper world (sepia, bleached cream) colliding with cold or sharp supernatural force. The contrast between them is the whole image.

vs Ufotable: Shounen Burst has a warm-world-meets-cold-force tension that Ufotable doesn't.

vs Retro Anime: Shounen Burst looks modern but uses warm degraded tones; Retro Anime imitates 80s/90s production.

Webtoon

korean manhwa · fashion-forward · clean polish

Crisp consistent linework, slightly rounder and more fashion-forward than Japanese manga. Solo Leveling energy. Versatile across genres.

vs Cinematic Anime: Webtoon is clean linework and strong character presence; Cinematic Anime has painterly rendering.

vs Retro Anime: Webtoon is hyper-clean and modern; Retro Anime intentionally degrades the image.

Gacha Splash

semi-chibi · premium action · vtuber key visual

Head slightly oversized but not full-chibi. Dynamic action pose. Premium cinematic lighting with particles and bloom.

vs Moe Gacha: Gacha Splash has more realistic proportions and more dramatic character presence.

vs Ufotable: Both dynamic anime, but Gacha Splash has semi-chibi scale and gacha-game polish.

Atmospheric & moody

Shadow, dread, staged environments, moral weight

Crewdson

interior · staged · loaded stillness

Large-format photography aesthetic. Every element deliberately placed. Suburban or coastal interiors.

vs Editorial Fashion: Crewdson is emotionally loaded and unsettling; Editorial Fashion is aspirational and pristine.

vs Soulslike: Crewdson is a staged interior moment; Soulslike is an exterior world already in ruin.

Soulslike

gothic ruins · cursed characters · decay

FromSoftware concept art aesthetic. Grey, ash, muted teal. Grandeur and dread together. Fog everywhere.

vs Dark Fantasy: Dark Fantasy has jewel-tone vibrancy (emerald, crimson); Soulslike drains all saturation.

vs Miura: Soulslike is environment-first; Miura is all about the character — obsessive armor and crosshatching.

Ironbloom

armor · mech · soft face vs hard machine

Soft anime face contrasted against hyper-detailed mechanical complexity — armor, mech suits, tactical gear. Two sub-moods: **Rendered** (earth tones, semi-flat shading, every surface detail) and **Flat/Ink** (flat color fills, line economy, palette fully user-defined).

vs Miura: Both armor-focused, but Ironbloom isolates on a white background with clean lineart; Miura uses dense crosshatch and heavy blacks.

vs Cel Shading: The Flat/Ink sub-mood shares line economy with Cel Shading, but Ironbloom stays character-forward; Cel Shading goes full poster-graphic energy.

Editorial Fashion

luxury · minimal · commercial

Clean, controlled, hyper-intentional. Every prop placed. Vogue-era photography energy. No texture, no clutter, no accident.

vs Crewdson: Editorial Fashion is aspirational and clean; Crewdson is emotionally loaded and deliberately unsettling.

vs Prism: Prism adds refracted crystal light; Editorial Fashion is stripped back and minimal.

Velvet

crimson-violet · lustrous · dangerous elegance

Premium dark-fantasy anime. Signature crimson-violet palette. Glossy rendering on satin and silk. Luminous eyes.

vs Dark Fantasy: Dark Fantasy is environment and concept art; Velvet is a character portrait with luxury rendering.

vs Prism: Prism is rainbow light on crystal; Velvet is crimson-violet gloss on fabric. Different materials, same polish tier.

Light & optics

Physically accurate light behavior as the subject itself

Prism

crystal · rainbow refraction · surreal luxury

Rainbow prism refractions scattered across the subject from crystal or gemstone elements. Hyper-detailed surreal luxury. The light itself is the **spectacle**.

vs Editorial Fashion: Both luxury-adjacent, but Prism adds surreal crystal-light effects; Editorial Fashion strips everything out.

vs Velvet: Prism is rainbow light on crystal; Velvet is crimson-violet gloss on fabric. Different materials, same polish tier.

Cinematic & photorealistic

Anime character design meets near-photographic rendering

Cinematic Anime

grounded · real-world gear · studio lighting

High-production 2D anime with directional studio lighting. Characters with real-world equipment in grounded settings. Polished without being photorealistic.

vs Hyperreal Anime: Cinematic Anime stays illustrative — skin reads as painted. Hyperreal pushes skin to near-photographic texture.

vs Ufotable: Cinematic Anime is quiet and grounded; Ufotable is explosive and supernatural.

Hyperreal Anime

near-photographic · fantasy oc · portrait

Anime facial features (expressive eyes, pointed ears) with near-photographic everything else. Skin has actual texture — pores, freckles, sweat.

vs Cinematic Anime: The surface is the difference. Cinematic stays illustrative; Hyperreal crosses into photorealistic skin.

vs Editorial Fashion: Editorial is photography-aesthetic; Hyperreal is an anime character rendered to photograph-level detail.

Digital & pixel

Constraint-driven digital craft — grids and bricks

JRPG Pixel Art

fine-grid pixels · anime design · equipment detail

Not chunky retro pixels — high-res fine-grid where every pixel is intentional. Anime facial conventions in pixel form. Detailed equipment and expressive eyes.

vs everything else: This is the only pixel art style in the library. There is no substitute — use it when the grid constraint is the aesthetic choice.

Brick Diorama

interlocking bricks · isometric · collectible

Isometric miniature scenes built entirely from genuine interlocking plastic building bricks on a fixed stud grid. Warm studio lighting, tilt-shift depth of field.

vs JRPG Pixel Art: Both are constraint-driven digital-craft styles, but Brick Diorama simulates physical toy construction; JRPG Pixel Art simulates a game sprite grid.

Flat & minimal

No gradients, clean linework, restrained shading

Gossamer

iyashikei · healing · light novel cg

Nearly shadowless. Thin barely-visible lineart. Muted cool palette. Serene, elegant. Fixed aesthetic — you can't change the mood.

vs Flat Cel: Gossamer is Flat Cel locked to a specific mood and palette. Flat Cel lets you pick any color and any genre.

vs Aquarelle: Gossamer is clean digital; Aquarelle has analog paper texture and warmth.

Flat Cel

universal · any genre · palette-free

The base flat technique with no mood or palette attached. One hard-edged shadow tone, lifted dark values. Use when you want flat rendering without Gossamer's serene aesthetic.

vs Gossamer: Flat Cel is the universal tool; Gossamer is Flat Cel pre-configured for healing and elegance.

vs Cel Shading: Flat Cel is anime digital; Cel Shading has bold black outlines and max saturation — louder, never quiet.

Flat Chibi

extreme chibi · flat cel · user-defined palette

Same extreme chibi proportions as Moe Gacha. But rendered flat — one hard shadow edge, no gradients, no atmospheric glow. Palette and mood fully user-defined.

vs Moe Gacha: Same body, different finish. Warm, cute, and glowing is Moe Gacha. Flat, bold, and graphic is Flat Chibi.

Sketch Moe

bold g-pen · hand-drawn · semi-deformed

Bold G-pen outlines with natural pressure variation and subtle hand-drawn wobble. Soft flat fills, muted saturation. Semi-deformed proportions — between chibi and normal. Premium doujinshi cover art feel.

vs Gossamer / Flat Cel: All three use flat coloring, but Sketch Moe's bold G-pen outlines are the opposite of Gossamer's barely-visible lines and Flat Cel's clean thin lines.

vs Daily Chibi: Daily Chibi is locked to mundane slice-of-life; Sketch Moe is genre-free with any expression or scene type.

Atelier

editorial value-shapes · restrained line · open palette

Hand-painted editorial key visual technique. Restrained lost-and-found line art and painterly value grouping across three to five value groups. Detail concentrated on the eyes, face, and hair; palette fully open.

vs Forma: Both simplify into large value shapes with detail on the face, and both leave palette open. Atelier builds gradients through painterly lost-and-found edges across 3-5 value groups; Forma uses crisp thin linework and a tighter 2-4 group range.

vs Cinematic Anime: Cinematic Anime renders every material with illustrated depth; Atelier restrains linework and concentrates finish only on the face.

Forma

graphic value block · urban gothic fantasy · crisp linework

The stricter, crisper sibling of Atelier — large flat value shapes across only two to four value groups, clean thin consistent linework instead of painterly edges. Calm, elegant, urban gothic fantasy mood; palette fully open.

vs Atelier: Same value-shape technique and open palette. The difference is purely rendering: Atelier's painterly lost-and-found edges vs Forma's crisp clean linework and tighter value-group range.

Clean & polished

Confident linework, fabric detail, white-background character art

Pixiv Clean

gestural fabric · clean face · oc showcase

Confident medium-weight linework with deliberate contrast between face and fabric rendering. Fabric folds use loose, gestural inner lines; faces are smooth and luminous. White or near-absent background. Soft ambient lighting.

vs Flat Cel / Gossamer: Pixiv Clean uses 1-2 shadow passes with some volume; Flat Cel and Gossamer aim for near-shadowless.

vs Sketch Moe: Both are Pixiv-adjacent, but Pixiv Clean has clean controlled lines; Sketch Moe has bold G-pen wobble and semi-deformed proportions.

Traditional media

Real analog media — ink, graphite, and colored pencil on paper

Sumi-e

ink wash · brush texture · tonal drama

Traditional Japanese ink wash on textured paper. Black ink tones only, built through brush pressure variation. Organic bleeding edges, white paper as light, full tonal range.

vs Pencil Sketch: Both monochrome on paper, but Sumi-e uses wet ink with bleeding edges and brush texture; Pencil Sketch is dry graphite with smooth gradients.

Colored Pencil

pencil strokes · hatching · handcrafted

Traditional colored pencil on white paper — form defined entirely by directional hatching and layered color buildup, no ink outlines. Paper tooth shows through; white paper serves as untouched highlight.

vs Sketch Moe: Sketch Moe uses bold G-pen outlines with flat fills. Colored Pencil has no ink outlines at all — feels like hours spent layering on paper.

Pencil Sketch

graphite · monochrome · tonal shading

Monochrome graphite pencil drawing. Smooth tonal gradients built through pencil pressure, mixed sharp and soft line quality, visible grain throughout.

vs Colored Pencil: Pencil Sketch is monochrome with smooth gradients; Colored Pencil uses color layering with visible crosshatching — a sketchbook study vs. a finished illustration.

vs Sumi-e: Both monochrome on paper, but Sumi-e is wet ink with bleeding edges; Pencil Sketch is dry graphite with smooth tonal gradients.

Ink & linework

Pure black ink, no color, no shading

Line Art

pure ink · two-tier weight · coloring-book clean

Pure black ink linework on white paper — no color, no shading, no tonal rendering. A strict two-tier line-weight system: thick bold silhouettes, thinner interior detail. Every mark purposeful.

vs Pencil Sketch: Line Art has zero tonal shading or grain; Pencil Sketch is built entirely from graphite tonal gradients.
