29 styles grouped by visual similarity, with key differentiators

Warm & painterly

Soft brushwork, inviting light, emotional atmosphere

Studio Ghibli nature · wonder · outdoors Lush, handcrafted environments. Dappled sunlight, golden afternoon, misty mornings. The world breathes. <i>vs Ember: Ghibli is nature and daylight; Ember is interiors and candlefire. Ghibli feels vast, Ember feels intimate.</i> <i>vs Aquarelle: Ghibli has rich saturated environments; Aquarelle is quieter and more restrained.</i>	Ember taverns · candlelight · intimacy Amber-lit dark fantasy interiors. Warmth as the dominant emotion. Feels safe despite the darkness behind it. <i>vs Ghibli: Same warmth, totally different setting. Ember lives inside at night; Ghibli lives outside in daylight.</i> <i>vs Storybook: Both warm, but Ember is darker and anime-rendered; Storybook is watercolour and child-safe.</i>
Aquarelle watercolour · restraint · OC portraits Delicate watercolour anime. Rough linework, faint paper texture, generous negative space. Characters feel unconventional. <i>vs Gossamer: Aquarelle has analog texture and warmth; Gossamer is clean digital with a cool, nearly shadowless finish.</i> <i>vs Storybook: Aquarelle is anime and character-forward; Storybook is illustrated children's book.</i>	Storybook fairy tales · animals · wonder Gouache/watercolour washes over ink linework. Warm ochres, dusty roses, cream. Safe, wonder-filled, clearly readable compositions. <i>vs Aquarelle: Storybook is children's illustration energy; Aquarelle is anime with analog texture.</i> <i>vs Daily Chibi: Storybook has environments and fairy-tale framing; Daily Chibi is modern anime slice-of-life indoors.</i>
Makoto Shinkai skies · longing · golden hour Hyper-detailed atmospheric skies, volumetric light rays, intensely saturated colour. Photographic backgrounds, clean anime characters. <i>vs Ghibli: Both painterly outdoors, but Shinkai is hyper-saturated and photorealistic in the background; Ghibli is hand-painted.</i> <i>vs Cinematic Anime: Shinkai is all about sky and atmosphere; Cinematic Anime is grounded in real-world equipment.</i>	

Dark & atmospheric

Shadow, dread, grand environments, moral weight

Kurosawa monochrome · landscapes · moral weight Desaturated or black-and-white. Lone figures against dramatic environments. Weather as emotional atmosphere. <i>vs Soulslike: Both grim, but Kurosawa is photographic film inspiration; Soulslike is fantasy concept art.</i> <i>vs Crewdson: Kurosawa is outdoors, swept, grand; Crewdson is indoors, staged, hyperreal.</i>	Crewdson interior · staged · loaded stillness Large-format photography aesthetic. Every element deliberately placed. Suburban or coastal interiors. <i>vs Kurosawa: Crewdson is interior, colour, hyper-composed; Kurosawa is outdoor, desaturated, elemental.</i> <i>vs Editorial Fashion: Crewdson is emotionally loaded and unsettling; Editorial Fashion is aspirational and pristine.</i>
Soulslike	Dark Fantasy

gothic ruins · cursed characters · decay FromSoftware concept art aesthetic. Grey, ash, muted teal. Grandeur and dread together. Fog everywhere. <i>vs Dark Fantasy: Dark Fantasy has jewel-tone vibrancy (emerald, crimson); Soulslike drains all saturation.</i> <i>vs Miura: Soulslike is environment-first; Miura is all about the character — obsessive armour and crosshatching.</i>	epic · jewel tones · world-building Brooding and saturated. Deep emerald, crimson, obsidian. Near-black backgrounds. Epic scale. Dangerous but visually gorgeous. <i>vs Soulslike: Dark Fantasy is vivid and saturated; Soulslike is desaturated and desolate. Same genre, opposite colour.</i> <i>vs Ufotable: Both dark and dramatic, but Ufotable is anime action with particles; Dark Fantasy is static concept art.</i>
Miura Berserk · crosshatch · armour obsession Dense precise crosshatching. Monochromatic or near-monochromatic. Obsessive structural detail. Feels engraved rather than drawn. <i>vs Soulslike: Miura is about the character's surface — every rivet; Soulslike is about the environment.</i> <i>vs Ironbloom: Both armour-heavy, but Miura uses dense crosshatch and heavy blacks; Ironbloom uses clean lineart with white-background isolation.</i>	Neon Noir rain · cyberpunk · night city Rain-slicked streets. Electric magenta, cyan, amber. Deep shadows, neon reflections. Mystery and dystopia. <i>vs Ufotable: Neon Noir is photographic urban night; Ufotable is anime action with particle and blade-light effects.</i>
Velvet crimson-violet · lustrous · dangerous elegance Premium dark-fantasy anime. Signature crimson-violet palette. Glossy rendering on satin and silk. Luminous eyes. <i>vs Dark Fantasy: Dark Fantasy is environment and concept art; Velvet is a character portrait with luxury rendering.</i> <i>vs Ufotable: Velvet is still, posed, and glossy; Ufotable is kinetic and motion-heavy.</i>	

Flat & minimal

No gradients, clean linework, restrained shading

Gossamer iyashikei · healing · light novel CG Nearly shadowless. Thin barely-visible lineart. Muted cool palette. Serene, elegant. Fixed aesthetic — you can't change the mood. <i>vs Flat Cel: Gossamer is Flat Cel locked to a specific mood and palette. Flat Cel lets you pick any colour and any genre.</i> <i>vs Aquarelle: Gossamer is clean digital; Aquarelle has analog paper texture and warmth.</i>	Flat Cel universal · any genre · palette-free The base flat technique with no mood or palette attached. One hard-edged shadow tone, lifted dark values. Use when you want flat rendering without Gossamer's serene aesthetic. <i>vs Gossamer: Flat Cel is the universal tool; Gossamer is Flat Cel pre-configured for healing and elegance.</i> <i>vs Cel Shading: Flat Cel is anime digital; Cel Shading has bold black outlines and max saturation — louder, never quiet.</i>
Cel Shading graphic novel · bold outlines · poster energy Bold black outlines, fully saturated flat fills, high-contrast shading. No gradients. The visual language of Borderlands and comic books. <i>vs Flat Cel: Cel Shading is louder — thick outlines, max saturation, poster composition. Flat Cel can be quiet. Cel Shading is never quiet.</i>	

Chibi cluster

The four ways to make small characters — not interchangeable

Moe Gacha extreme chibi · warm painterly · action Full chibi (head = 1/3 to 1/2 body height). Warm golden atmospheric lighting with painted gradients. Soft particle effects. Any genre, always dynamic. <i>vs Flat Chibi: Same extreme proportions, different render. Moe Gacha is warm and painterly; Flat Chibi is flat cel — bold and graphic.</i> <i>vs Gacha Splash: Moe Gacha is full-chibi; Gacha Splash is semi-chibi (head only slightly oversized).</i>	Flat Chibi extreme chibi · flat cel · user-defined palette Same extreme chibi proportions as Moe Gacha. But rendered flat — one hard shadow edge, no gradients, no atmospheric glow. Palette and mood fully user-defined. <i>vs Moe Gacha: Same body, different finish. Warm cute and glowing = Moe Gacha. Flat bold and graphic = Flat Chibi.</i>
Gacha Splash semi-chibi · premium action · VTuber key visual Head slightly oversized but not full-chibi. Dynamic action pose. Premium cinematic lighting with particles and bloom. <i>vs Moe Gacha: Gacha Splash has more realistic proportions and more dramatic character presence.</i> <i>vs Ufotable: Both dynamic anime, but Gacha Splash has semi-chibi scale and gacha-game polish.</i>	Daily Chibi semi-chibi · slice-of-life · cozy mundane Head about 1/4 of total height — mild chibi, not extreme. Always in a mundane context: eating, relaxing, a cafe. No action. Warmth and cosiness. <i>vs Moe Gacha: Daily Chibi is static and domestic; Moe Gacha is dynamic and action-ready.</i> <i>vs Storybook: Daily Chibi is modern anime cosy; Storybook is illustrated fairy-tale with animal characters.</i>

High-production anime

Action, drama, polish — each with a distinct visual signature

Ufotable Demon Slayer · Fate · action key visual Jewel-tone deep colours (crimson, electric blue, gold) against near-black. Particle trails, blade-light, supernatural glow. Kinetic and dramatic. <i>vs Cinematic Anime: Ufotable is supernatural action with colour-bloom; Cinematic Anime is grounded in realistic settings.</i> <i>vs Shounen Burst: Both action, but Ufotable is polished jewel-tones; Shounen Burst has a warm sepia world being shattered.</i>	Shounen Burst power awakening · warm vs cold · urban destruction Warm aged-paper world (sepia, bleached cream) colliding with cold or sharp supernatural force. The contrast between them is the whole image. <i>vs Ufotable: Shounen Burst has a warm-world-meets-cold-force tension that Ufotable doesn't.</i> <i>vs Retro Anime: Shounen Burst looks modern but uses warm degraded tones; Retro Anime imitates 80s/90s production.</i>
Cinematic Anime grounded · real-world gear · studio lighting High-production 2D anime with directional studio lighting. Characters with real-world equipment in grounded settings. Polished without being photorealistic. <i>vs Hyperreal Anime: Cinematic Anime stays illustrative — skin reads as painted. Hyperreal pushes skin to near-photographic texture.</i> <i>vs Ufotable: Cinematic Anime is quiet and grounded; Ufotable is explosive and supernatural.</i>	Hyperreal Anime near-photographic · fantasy OC · portrait Anime facial features (expressive eyes, pointed ears) with near-photographic everything else. Skin has actual texture — pores, freckles, sweat. <i>vs Cinematic Anime: The surface is the difference. Cinematic stays illustrative; Hyperreal crosses into photorealistic skin.</i> <i>vs Editorial Fashion: Editorial is photography-aesthetic; Hyperreal is an anime character rendered to photograph-level detail.</i>
Webtoon Korean manhwa · fashion-forward · clean polish Crisp consistent linework, slightly rounder and more fashion-forward than Japanese manga. Solo Leveling energy. Versatile across genres.	Retro Anime 80s–90s · film grain · Akira energy Akira, Ghost in the Shell, Cowboy Bebop. Film grain, color bleed at edges, visible cel artifacts. Nostalgia is the point.

<i>vs Cinematic Anime: Webtoon is clean linework and strong character presence; Cinematic has painterly rendering.</i> <i>vs Retro Anime: Webtoon is hyper-clean and modern; Retro Anime intentionally degrades the image.</i>	<i>vs Webtoon: Webtoon is ultra-modern crisp; Retro Anime deliberately imitates analog degradation.</i> <i>vs Shounen Burst: Retro uses actual 80s/90s production aesthetics; Shounen Burst uses warm degradation for emotional contrast.</i>
---	--

Photographic & editorial

Rooted in real-world aesthetics, not anime

Editorial Fashion luxury · minimal · commercial Clean, controlled, hyper-intentional. Every prop placed. Vogue-era photography energy. No texture, no clutter, no accident. <i>vs Crewdson: Editorial Fashion is aspirational and clean; Crewdson is emotionally loaded and deliberately unsettling.</i> <i>vs Prism: Prism adds refracted crystal light; Editorial Fashion is stripped back and minimal.</i>	Prism crystal · rainbow refraction · surreal luxury Rainbow prism refractions scattered across the subject from crystal or gemstone elements. Hyper-detailed surreal luxury. The light itself is the spectacle. <i>vs Editorial Fashion: Both luxury-adjacent, but Prism adds surreal crystal-light effects; Editorial Fashion strips everything out.</i> <i>vs Velvet: Prism is rainbow light on crystal; Velvet is crimson-violet gloss on fabric. Different materials, same polish tier.</i>
--	--

Technical & specialised

Strong in one specific lane

Ironbloom armour · mech · soft face vs hard machine Soft anime face contrasted against hyper-detailed mechanical complexity — armour, mech suits, tactical gear. Two sub-moods: Rendered (earth tones, semi-flat shading, every surface detail) and Flat/Ink (flat colour fills, line economy, palette fully user-defined). <i>vs Miura: Both armour-focused, but Ironbloom isolates on a white background with clean lineart; Miura uses dense crosshatch and heavy blacks.</i> <i>vs Cel Shading: The Flat/Ink sub-mood shares line economy with Cel Shading, but Ironbloom stays character-forward; Cel Shading goes full poster-graphic energy.</i>	JRPG Pixel Art fine-grid pixels · anime design · equipment detail Not chunky retro pixels — high-res fine-grid where every pixel is intentional. Anime facial conventions in pixel form. Detailed equipment and expressive eyes. <i>vs everything else: This is the only pixel art style in the library. There is no substitute — use it when the grid constraint is the aesthetic choice.</i>
